## Zyto Dot 2S

## ZytoDot ${ }^{\circledR}$ 2C SPEC ERBB2/CEN 17 Probe

## Background

The ZytoDot ${ }^{\circledR}$ 2C SPEC ERBB2/CEN 17 Probe (PD12) is intended to be used for the qualitative detection of amplifications involving the human ERBB2 gene as well as the detection of chromosome 17 alpha satellites in formalin-fixed, paraffin-embedded specimens, such as breast cancer, by chromogenic in situ hybridization (CISH). The probe is intended to be used in combination with the ZytoDot ${ }^{\circledR}$ 2C CISH Implementation Kit (Prod. No. C-3044-10/-40). The product is intended for professional use only. All tests using the product should be performed in a certified, licensed anatomic pathology laboratory under the supervision of a pathologist/human geneticist by qualified personnel. The probe is intended to be used as an aid to the differential diagnosis of breast cancer and therapeutic measures should not be initiated based on the test result alone.

## Probe Description

The ZytoDot ${ }^{\circledR}$ 2C SPEC ERBB2/CEN 17
Probe is composed of:
Digoxigenin-labeled polynucleotides ( $1.1 \mathrm{ng} / \mu \mathrm{l})$, which target sequences mapping in 17q12** (chr17:37,725,661-37,973,541) harboring the ERBB2 gene region.
Dinitrophenyl-labeled polynucleotides (~1.1 ng/ $\mu$ ), which target sequences mapping in 17pl1.1-q11.1 specific for the alpha satellite centromeric region D17Z1 of chromosome 17.
Formamide based hybridization buffer

Ideogram of chromosome 17 indicating the hybridization locations.

## Results

Using the ZytoDot ${ }^{\circledR}$ 2C SPEC ERBB2/CEN 17 Probe Kit, two green (ERBB2) and two red (CEN 17) signals are expected in a normal interphase nucleus. In a cell with amplification of the ERBB2 gene locus, multiple copies of the green signal or green signal clusters will be observed.

SPEC ERBB2/CEN 17 Probe hybridized to normal interphase cells as indicated by two red and two green signals per nucleus.

Breast cancer tissue section with ERBB2 amplification as indicated by multiple green signals in each nucleus.
