

DAPI/DuraTect™ Solutions

Product Description

ZytoVision's DAPI/Antifade Mounting Solutions are ready-to-use mounting media that are applied directly to fluorescently labeled tissue or cell specimens on microscope slides. They contain the nuclear counterstain DAPI (4', 6-diamidino-2-phenylindole) which produces a blue fluorescence when bound to DNA.

ZytoVision's DAPI/Antifade Mounting Solutions are optimized to be used on tissue or cell specimens that have been hybridized with any available *ZytoLight*®, *FlexISH*®, or *ZytoMation*® FISH Probe. They are all particularly compatible with the ZytoVision fluorochromes *ZyGreen*™, *ZyOrange*™, *ZyBlue*™, *ZyGold*™ and *ZyRed*™.

ZytoVision's DAPI/Antifade Mounting Solutions prevent permanent loss of fluorescence and protect fluorescent dyes from photobleaching during fluorescence microscopy.
